

SAP Concur 

Build Momentum and Resilience with SAP Concur Solutions

THE BEST RUN

For Recovery and Growth, Agility is Essential

The global response to COVID-19 in 2020 presented some of the biggest challenges businesses had to face in modern times. It was a time of reducing costs, adapting to rapidly shifting work patterns, reworking processes to function in a decentralised work environment, and so many other unexpected situations. Because of these challenges, enterprises have become more agile and better able to respond to business conditions.

Establishing and increasing business momentum takes a continuous commitment to improvement. With all that's happened in the world recently, it might be time to make sure how you manage spending, travel, and the policies you have in place, fit with how you are doing business today. By creating better efficiencies, gaining visibility, and improving overall operational processes, you position your organisation to respond to market pressures and opportunities as they arise, so your organisation can better prepare for future growth opportunities.

BE READY FOR WHAT'S NEXT

To ensure your organisation is prepared for recovery and growth, make sure your automated spend solution includes:

- **Localised policies and support:** Utilise best practices with policies, templates, and support that are localised for each global region.
- **Global compliance:** Timely visibility and proactive management of regional and global tax, data processing, and other regulations for informed business decisions.
- **Travel and spend management visibility:** Visibility across all regions of your employee travel and spend program to see where spend happens and allow you to maximise your time and investment for global travel and business needs.

86%

of business leaders agree the pandemic has led to more experimentation and quick strategy shifts.¹

73%

say that access to near real-time data and analytics will help them achieve strategic goals.¹

42%

of employee expense transactions don't meet VAT/GST reclaim compliance requirements.²

Grow How You Want with Tools for **Optimisation** and **Expansion**

Preparing your organisation and teams for future growth requires a solid foundation in the here and now. Through platform and vendor consolidation, as well as adherence to industry best-practices, you can transform your program into a well-oiled machine, capable of responding to market pressures and opportunities as they arise. Here are the areas we recommend focusing on to position your organisation for growth and recovery:

- **Improve audit efficiency:** Having the proper tools, processes, and procedures in place to successfully audit expenses enables your organisation to increase spend under audit and remain compliant with local and global policies.
- **Optimise airfare spend:** When travelling around the globe, there are advantages to encouraging travellers to book further in advance – more money back to your business and increased visibility for duty of care and compliance.
- **Decrease time spent on support and maintenance:** Maintaining a centrally located, single cloud platform for all your global locations reduces IT overhead. Outsourcing native-language support for each local market helps reduce the burden on your administrators.

“SAP Concur [solutions] allows you to implement a more efficient, more accurate, and more compliant system than normally you would expect to find in localised or specific markets.”

– T&E Process Lead, Smith and Nephew

No matter how you grow, SAP® Concur® solutions can help you get there with tools that increase visibility across borders while taking the burden off your team.
